

Flow Type Script
for Adobe InDesign

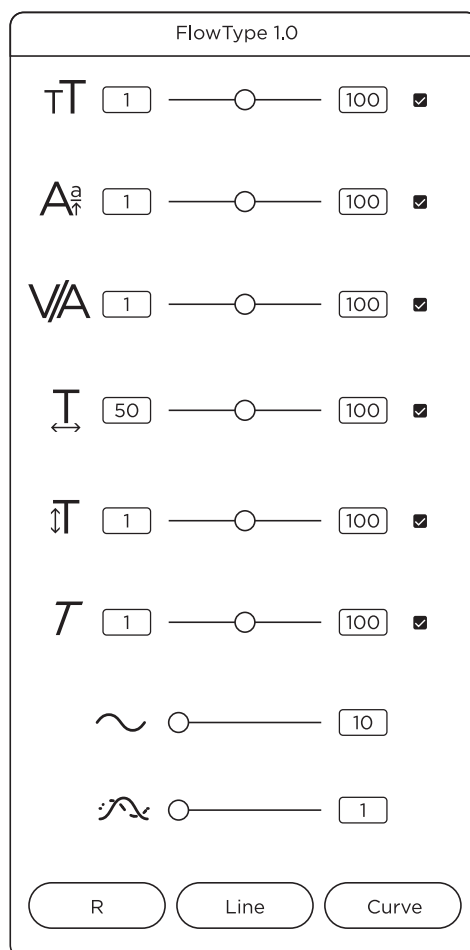

Beetroot Labs
Type tools

FLOW TYPE

Flow Type is a typographic tool in the form of an Adobe InDesign script effect that helps you approach typography in an expressive, restless, unexpected and disruptive way.

The tool allows the concepts of motion and time flow to express themselves, bending the traditional typography rules.

Flow Type gradually manipulates the values of every character in a text box in a linear or sinusoid fashion.

Installation

Open script panel in Indesign (or press Ctrl+Alt+F11)

Right click on the “User” folder and choose
“Reveal in Explorer/Finder”

Copy the contents of the “FlowType_Indesign” folder
inside the “Scripts Panel” folder

Go back to inDesign and double click on the
FlowType.jsx that should appear now in your
scripts panel under the “User” folder

Play away :)

Notes on use

The functions work both on text frames and text selections.

Keep in mind that it may take a while when used in large body of text.

So be patient.

Be carefull when you use extreme values. When the script tries to make the
character size larger than the artboard, InDesign may crash.

Licence disclaimer

Permission is hereby granted, free of charge, to any person obtaining a copy of this software and associated documentation files (the "Software"),to deal in the Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense,and/or sell copies of the Software, and to permit persons to whom the Software is furnished to do so, subject to the following conditions:
