# Flow Type

## *Flow Type*

**Flow Type** is a typographic tool in the form of an After Effects pseudo effect that helps you approach typography in an expressive, restless, unexpected and disruptive way. The tool allows the concepts of motion and time flow to express themselves, bending the traditional typography rules.

Flow Type gradually manipulates the values of every character in a text box in a linear or sinusoid fashion.

## Installation

Copy the contents of the “FlowType\_AfterEffects” folder inside the “ScriptUI Panels” folder.

Restart After Effects and select "FlowType.jsx" from the bottom of the "Window" menu.

It should open a panel with two buttons:

- FlowType Instance

Applies the pseudo effect on type layers (The layer needs to be selected)

- Find Loop Point

When the effect is selected and the speed is in auto mode you can find the loop point of the time animation.

Play away :)

## Notes on use

Keep in mind that “FlowType” is not an actual effect but a collection of controllers and linked expressions, so you cannot duplicate or copy paste it to other layers but you need to reapply it as an instance. You can still copy paste property keys between them though.

## Licence disclaimer

Permission is hereby granted, free of charge, to any person obtaining a copy of this software and associated documentation files (the "Software"), to deal in the Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies of the Software, and to permit persons to whom the Software is furnished to do so, subject to the following conditions:

Have fun using the type tools.
